

Praxist Run Report: run_2026-08-30_05-34-44-478314_praxist_task

Generated at: 2026-08-30T16:57:11Z

Trigger: final_run_completion

Generation context: 3

Report kind: frontier_lineage_health

Run directory:

/Users/jondev/dev/active/socratink/product/socratink/praxist_task/experiments/run_2026-08-30_05

A. Strongest Variants And Pareto Front

No clean frontier/Pareto entries were found. Mature measurements and broader validation signals are shown separately.

Strong signals requiring validation:

- protocol_reliability_score (maximize): gen0_peer2_C06_protocol_violation_falsifier = 0.964286; promotion_eligible=false
- critical_violation_count (minimize): instruction-8819993436461d92 = 0; promotion_eligible=false
- assistance_visibility_rate (maximize): gen0_peer2_C06_protocol_violation_falsifier = 1; promotion_eligible=false
- bounded_move_rate (maximize): instruction-8819993436461d92 = 1; promotion_eligible=false
- fixture_pass_rate (maximize): gen0_peer2_C06_protocol_violation_falsifier = 0.875; promotion_eligible=false
- instruction_chars (minimize): instruction-8819993436461d92 = 934; promotion_eligible=false
- protocol_reliability_lcb (maximize): gen0_peer2_C06_protocol_violation_falsifier = 0.529105; promotion_eligible=false

B. Strong-Variant Evolution And Lineage

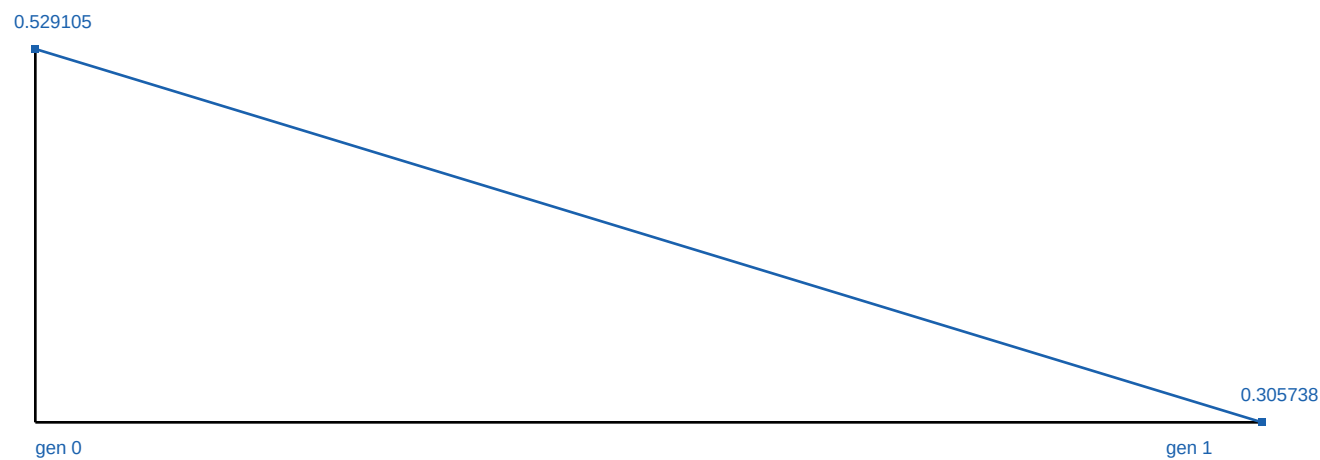

No lineage can be inferred from the available result signals yet.

C. Run Health And Evidence State

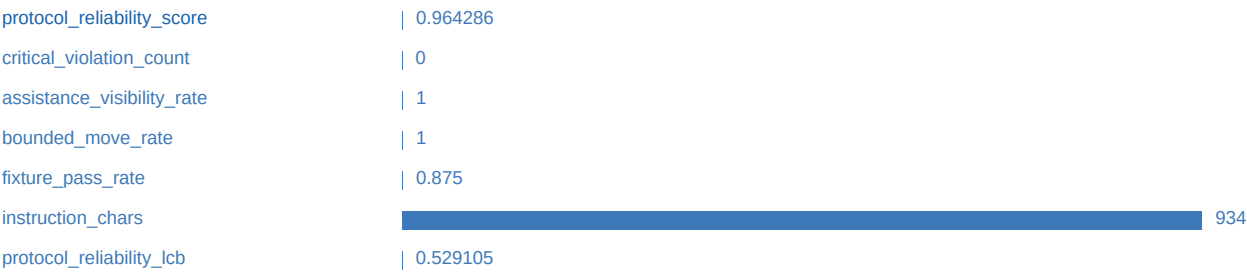

- Status: 'succeeded', exit condition: 'max_generations'.
- Generation progress: '4' / '4'.
- Structured findings visible: '6'.
- No explicit run-summary warnings were found.

Visual Companion

Signal-only protocol_reliability_lcb observations by generation

Signal-only metric leaders by task dimension

protocol_reliability_score vs critical_violation_count
